

VELA JIVE 100

VELA Jive 100 is a ground breaking chair for e.g. the surgeons which can prevent injuries caused by excessive strain and awkward movements. The foot-operated electric height adjustment feature enables uninterrupted sterile procedures and therefore reduces treatment time.

Press here with your foot and adjust the height electrically

Or change the height on the wheels

- Electric height adjustment - just by using your feet - making it possible to gently change position without removing focus from the operation
- Electric height adjustment enables precise, stepless regulation without any undesired movement
- Ergonomic chair with fantastic seat and back support. There are different seats and backs available - designed to fit the needs of the individual users
- Frame gives space to the feet and a good balance during precision work
- Battery indicator on the front of the chair

VELA JIVE 100 - REMARKABLE NEW FRAME

This brand new chair, VELA Jive 100, from Danish VELA Medical, is a ground breaking chair for the healthcare workers which can prevent injuries caused by excessive strain and awkward movements.

The remarkable asymmetric frame gives space to the feet and increases the users balance which is important for precision work.

ELECTRIC SITTING HEIGHT

The foot-operated electric height adjustment feature enables uninterrupted sterile procedures and therefore reduces treatment time.

Electric height adjustment enables precise, stepless regulation performed in a completely controlled way without undesired movements. The height adjustment can be placed on the footrest or on the top of the front wheels.

The chair is also available with a traditional gaspring as height adjustment.

INCREASING CONCENTRATION

The surgeons work is done with a high degree of concentration and thus a fixed working position. The seat design increases the blood circulation which increases the concentration on the operation.

VELA JIVE 100

COMFORT AND ERGONOMICS

Ergonomic design is paramount at VELA. The seats have a rounded front edge and we offer several different specially designed seats and backs to promote the best - and individual- posture possible. Hospital chairs see service in a variety of departments; both staff and patients have particular requirements with respect to ergonomics and comfort, features which can prevent injuries caused by excessive strain and awkward movements.

VELA's focus on ergonomics and correct posture allows surgeons to work longer since the VELA chair promotes a more appropriate work posture.

VELA ergonomic chairs support the back and ensure comfort at work. The frame and fabric is developed for the medical environment both designed with a high hygienic focus.

HIGHEST QUALITY - 365 DAYS-A-YEAR - EVERY YEAR
